

The UK's
No.1
for Taps &
Showers

NEW MILA

The everyday just got
more brilliant

PRODUCT BENEFITS EXPLAINED

SAFE TOUCH

Designed to keep the exterior cool to the touch, ensuring you're never at risk of scalding.

DIGITAL SHOWER

Has sophisticated technology, greater functionality, and/or smart features.

PRECISE GLIDE

Features ceramic cartridges for long life durability and more precise control.

SECURE FIX

Comes with metal fixings to secure your tap in place, so it won't move or rotate during use.

EASY FIT INSTALLATION

Designed to make installation quicker and easier.

MATCHING TAPS/SHOWER

Matching taps and showers are available.

1 OUTLET

One shower outlet.

2 OUTLETS, 1 ON

Two shower outlets, which only run separately.

2 OUTLETS, 2 ON

Two shower outlets, which can both run at once.

3 OUTLETS, 2 ON

Three shower outlets, two of which can run at the same time.

DECOR SMART

Will use existing holes and fixings to fit in the same spot as your previous shower.

LUMINANCE CHROME

A hard-wearing, flawless finish that lasts for years. It's also scratch resistant and salt spray tested to ensure added durability.

FAMILY SAFE

Thermostatic temperature control and automatic stops prevent surges of hot or cold water.

RUB CLEAN

There's no need to scrub. Limescale build-up can be easily wiped off the nozzles of this shower product.

QUICK CHANGE

To change this product for something else, simply turn off the water supply and remove.

ECO-FRIENDLY

This shower saves as much water as possible (but it doesn't feel like it).

REJUVENATING

This shower uses a medium amount of water - just enough for a powerful, rejuvenating flow.

DRENCHING

This shower fully soaks you with water for the most indulgent showering experience.

ANTI-LIMESCALE

Reduces build up and helps extend product life.

THERMOSAFE

Thermostatic feature avoids temperature changes when water is used elsewhere in your home.

BRISTAN

EASY CHOICE. HARD TO BEAT.

At Bristan, we find brilliantly simple ways to make life easier for every customer. Creating taps, showers, sinks and accessories that fit perfectly into your needs, your lifestyle and your budget. Making sure that our products are consistently easy to choose, install and use. And providing complete

confidence with technical support and advice to help you find the right solution at the right time.

Whether you need a single tap or a hundred, you can trust Bristan to give you quality without complexity.

It's why we're Britain's number one.

Now guaranteed for 10 years.

At Bristan, we're constantly inspired by our customers to make improvements across our range. That's why we have enhanced the

specification of our core range of taps with next-generation components that make our taps perform even better than before.

Across our bathroom and kitchen tap ranges* you'll find products that are quieter, smoother and even more durable. In fact, we're so confident of the quality of our new and updated components, and the extensive life-cycle testing they go through, that we've increased our guarantee period from 5 years to 10.

BRISTAN

BATHROOM TAPS

KITCHEN TAPS

The everyday just got more brilliant. Our taps are now built around cartridges tested to 500,000 cycles with improved flow rates and smoother operation. You really can count on Bristan taps
- we guarantee it.

*exclusions, terms and conditions apply.
See bristan.com for details.

JUST GOT EASIER

Kitchen Sinks

With our unique Easyfit tap base system already pre-installed, you can make more time for other jobs - or simply finish faster.

see page 162

Kitchen Taps

AS EASY AS 1,2,3...

1 Slot the Easyfit base into the sink, insert the hot inlet connector and fix to the sink.

2 Attach the flexi tails and isolators to the existing water supply.

3 Push the tap body on and tighten both grub screws to finish.

See page 134

ART DECO

The Timeless Art Deco collection exudes all the glamour of the 1920s Art Deco movement for a modern world. It uniquely balances traditional styling with angular shapes and a more contemporary, industrial feel, making it perfect for customers searching for a chic finish to an on-trend space. All built using the classic methods and precision of quality watchmakers.

□ Core Range □ Essentials Range

Why choose an electric shower?

Hot water on demand - no matter what

Fed from your cold water mains-feed rather than a hot water cylinder, electric showers are the economical option as water is heated as you need it through an integral heater in the shower unit. This means you can always have a hot shower no matter how busy your bathroom is or even if your boiler breaks.

All of our electric showers are simple to fit with multiple water and cable points to make replacement easy.

choosing your shower booster pumps

The chart below supplies all the information required to allow you to select your Bristan Booster Pump. Pumps are rated in bar pressure, one bar pressure is equal to raising your cold water tank/cistern by 10 metres above its current position, so a 2.0 bar twin Bristan pump is the equivalent to raising your tank/cistern 20 metres above its current position. This will create a high pressure shower.

Pump Type	STPUMPI5TN	STPUMP20TN	STPUMP20SG	ST NHPUMP 20TN
Performance - Boost	Medium Boost	High Boost	High Boost	High Boost
Maximum Pressure / Flow Litres / Min	1.5 bar / 32 LPM	2.0 bar / 35 LPM	2.0 bar / 17 LPM	2.0 bar / 40 LPM
System Friendly - Peripheral Impeller	Twin	Twin	Single	Twin
Application - Single Shower / Mixer tap	•	•		
Application - Outlet Pump on Shower system or to boost individual Taps			•	
Fully Automatic Flow Switch Control	0.8 LPM sensitivity	0.8 LPM sensitivity	0.8 LPM sensitivity	0.8 LPM sensitivity
Motor - Powerful Induction Motor	385 Watts	420 Watts	215 Watts	430 Watts
Motor Rating @ 9 litres / minute	30 minutes (S3)	30 minutes (S3)	30 minutes (S3)	30 minutes (S3)
Power Supply - 230/1/50	•	•	•	•
Motor supplied with Anti Vibration Feet	•	•	•	•
Factory pre - wired	•	•	•	•
Fuse Rating	5 Amps	5 Amps	5 Amps	5 Amps

Low Noise	•	•	•	•

Pump Selection

When selecting a pump, first check to see if the tap / shower to be pumped is designed for a low pressure or high pressure system. If designed for low pressure select our Medium Pressure 1.5 bar pump, however if it's designed for high pressure select our High Pressure 2.0 bar pump.

Twin Pumps

Twin pumps are designed to be installed between the cold water tank / cistern and the hot water cylinder so that they boost the water supply into the shower or tap.

Single Pumps

Single pumps can be used with a shower; the pump being installed to the mixer outlet, pumping the blended hot & cold water away from the shower valve and up to the shower head.

Single pumps can also be used to boost individual hot and cold tank fed water supplies to individual taps.

Controls

Bristan pumps are fitted with flow switches; these automatically start the pump once the flow from the shower / tap to be pumped exceeds 0.8 litres per minute. If your system has not got this minimum flow, contact Bristan for advice prior to purchase.

Pump Location

Bristan pumps are designed to be most effective pushing water, for this reason our preferred pump location is on the floor next to the hot water cylinder.

Hot & Cold Water Storage

Ensure that your Hot water cylinder & Cold water tank / cistern have sufficient capacity to meet the pumped demand.

Connections to the water supply

Cold Water Supply:

The pump must be supplied with a dedicated feed direct from the cold water storage tank / cistern.

Hot Water Supply:

The pump must be supplied with a dedicated feed direct from the hot water cylinder.

Connection using a Stuart Turner cylinder flange or factory fitted secondary tapping if fitting, or alternatively it can be the first draw off from the underside of the open-vent. Hot water should not exceed 65 degrees C entering the pump and must be free of air. Both hot and cold supply pipes should be fitted with full flow service valves to aid maintenance (not supplied)

Under no circumstances should the pump be connected either directly or indirectly to the cold water mains supply.

Electrical connection

The pump must be installed by a competent person to all relevant IEE Wiring Regulation (BS7671) and should be wired directly to a double pole fused spur, complying with BS 1363-4 and protected with a 5 Amp fuse.

Full fitting instructions are supplied with every Bristan Pump. These should be followed carefully.

Installed correctly your Bristan pump will give years of reliable service.

Easy as 1, 2, 3

Our sinks come pre-installed with our Easyfit tap base, flexible tails and a choice of Easyfit taps.

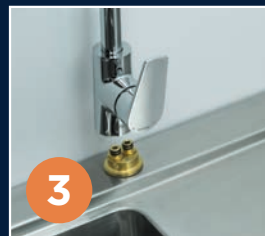

1

Fit your chosen sink using the fitting instructions.

2

Attach the pre-fitted flexi tails and isolators to the existing water supply.

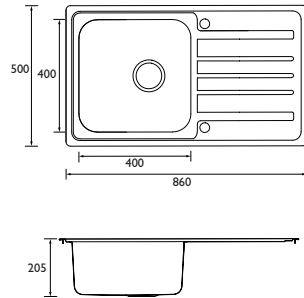

3

Push the tap body on and tighten both grub screws to finish.

OUTLET FLOW REGULATORS

Flow regulators can easily be retro fitted between a mixer body/shower valve **outlet** connection and the shower hose. However, please note for **TMV2 approved products fitted on a combi boiler heating system**, it is recommended that flow

regulators are fitted between the mixer body and **both shower valve inlet connections**. This will ensure the valves performance is maintained, especially during the winter months, when the incoming water temperature is lower.

OUTLET FLOW REGULATORS

CODE	TYPE	PRICE
ECO SHW 04	4 litres per minute	£12.00 ** Grey
ECO SHW 05	5 litres per minute	£12.00 ** Yellow
ECO SHW 06	6 litres per minute	£12.00 ** Black
ECO SHW 07	7 litres per minute	£12.00 Green
ECO SHW 08	8 litres per minute	£12.00 White
ECO SHW 10	10 litres per minute	£12.00 Blue
ECO SHW 14	14 litres per minute	£12.00 Pink

**Not suitable for use where products are fitted on a Combi system
Please contact customer service on 0844 7016273 for details on inlet flow regulators.

FLOW REGULATORS & AERATORS - TAPS

FITTING A FLOW REGULATOR TO THE TAIL OF A TAP

Step One
The flow regulator will fit into the inlet of the tap.

Step Two
Carefully push the flow regulator into the inlet of the tap.

Step Three
Connect the pipework to the tap in the usual way.

FITTING AN AERATOR / SPRAY REGULATOR TO A TAP SPOUT

Step One
Carefully remove the existing flow straightener.

Step Two
Screw the new flow regulating aerator into place.

Step Three
Carefully tighten into the tap using a suitable spanner.

- Integral Thermal Flushing for Infection Control
- Easy Isolation and Filter Removal

CODE	TYPE	Min. Press.	PRICE
OP TS3650 CL C	Concealed Shower Valve	0,2 bar	POA

OPAC Thermostatic Exposed Shower Valve with Chrome Lever and Isolation Elbows

- Isolation elbows included as standard
- Single sequential control for both temperature and flow
- High performance at pressures as low as 0.2 bar

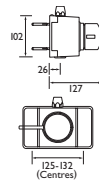

CODE	TYPE	Min. Press.	PRICE
OP TS1503 ISOL C	Exposed Shower Valve	0.2 bar	POA

OPAC Thermostatic Exposed Shower Valve with Chrome Lever and Shroud

- Single sequential control for both temperature and flow
- ABS protective shroud ensures safe surface temperature
- Adjustable inlet elbows allow centres between 125mm - 132mm

CODE	TYPE	Min. Press.	PRICE
OP TS1503 SCL C	Exposed Shower Valve	0.2 bar	POA

EXTENSION AND ISOLATION ELBOWS

Contract

Medium Elbow Kit (138-145mm) for TS1503 and TS1875 Valves

- For use with STR TS1875 EDC C, STR TS1875 CDC C, OP TS1503 EH C & OP TS1503 EL C valves
- Allows conversions from 138 - 145mm centres
- Includes 2 x 7 L/min flow regulators

CODE	TYPE	PRICE
SKINLET-15CP	Medium Elbow Kit	POA

Long Elbow Kit (148-158mm) for TS1503 and TS1875 Valves

- For use with OP TS1503 EH C, OP TS1503 EL C, STR TS1875 EDC C valves
- Allows conversions from 148 - 158mm centres
- Includes 1 x 7 L/min and 1 x 5 L/min flow regulators

CODE	TYPE	PRICE
SKINLET-7CP	Long Elbow Kit	POA

Isolation Elbow (175mm) Pair

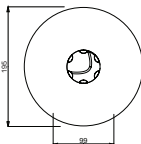

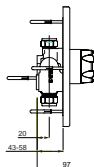

- For use with OP TS1503 EH C, OP TS1503 EL C valves
- Provides isolation at the valve for ease of servicing
- Includes 1 x 7 L/min and 1 x 5 L/min flow regulators

CODE	TYPE	PRICE
SKINLET-2CP	Isolation Elbows	POA

OPAC Thermostatic Concealed Mini Valve with Chrome Handwheel

- Single sequential control for both temperature and flow
- Concealed shower with easy-access cover plate for servicing
- Integral isolator and easy clean filters

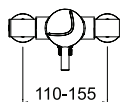

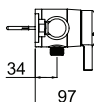

CODE	TYPE	Min. Press.	PRICE
MINI2 TS1203 CH C	Concealed Mini Valve	0.2 bar	POA

OPAC Thermostatic Exposed Mini Valve with Chrome Lever

- Single sequential control for both temperature and flow
- Adjustable inlet centres mean you can use existing pipework with centres between 110mm - 155mm
- High performance even at 0.5 bar inlet pressure

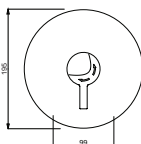

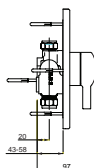

CODE	TYPE	Min. Press.	PRICE
